DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. Accordingly, the title should be changed into - - Multi-domain liquid crystal display device having particular electric field distorting means - -.

Application/Control Number: 10/713,192 Page 3

Art Unit: 2871

Allowable Subject Matter

1. Claims 1-20 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Claims 1-20 are allowable because the prior art of record neither anticipated nor rendered obvious that a multi-domain liquid crystal display device comprises relationships of various elements as claimed with specific features recited in <u>claims 1</u> and 10:

at least three electric field distorting means on a domain boundary of the pixel on one of the first and second substrates, the electric field distorting means being parallel to the boundary between the two domains such that a linear disclination is formed at the boundary between the two domains when a vertical electric field is formed between the common electrode and the pixel electrode, wherein two electric field distorting means extend to edges of the pixel region and the remaining one electric field distorting means is located at a central portion of the domain boundary as shown in Fig.7.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
